

# The perfect solution

## Satellite Navigation

The GSN-002 is a compact and easily installed 'black box' navigation system that is designed to be used with the Backeye range of CCTV systems. It provides route information, points of interest (POI) and mapping with a spoken text voice prompt that can announce streets by name.

### Features;

- 12 parallel channel GPS (SiRF Star III high sensitivity GPS receiver)
- Preloaded maps for the UK and Europe (street level)
- SD card slot for loading custom POI and additional map data and updates
- Composite video output for compatible displays (PAL or NTSC)
- Announces street by name to help you keep your eyes on the road
- Arrange destinations to minimize trip distance
- Proximity alert feature to warn of upcoming custom POI, such as safety cameras
- View the map in either 3-D perspective or top down, track-up or north-up view
- RoHS compliant
- Traffic message channel (optional)
- External speaker

## Backeye CCTV systems

Brigade has been in the business of reversing safety for over 30 years and offers an extensive range of cameras and monitors to suit every vehicle and requirement.

### Features;

- A choice of TFT LCD flat screen colour monitors from 3.5" up to 7.0"
- A choice of compact, low light cameras for rear, side, front and internal views
- All Backeye CCTV systems are RoHS compliant, rigorously HALT tested for robustness and all cameras are waterproof

## Camera and monitor examples

**BE-870EM/FM Monitor**  
7.0" widescreen  
LED backlighting for longer life

### BE-300 series

Compact, flush mounted camera  
Side, front, rear and internal view  
capability

**BE-800C Camera**  
Ultra low light camera  
Integral sunshield

**BE-850 Monitor**  
5.0" low reflection,  
high quality TFT LCD screen

**BE-835 Monitor**  
3.5" compact TFT flat  
screen monitor

# Space saving convenience

## Brigade Reversing Camera System with Garmin Satellite Navigation

The perfect solution for reversing safety and accurate route information.

Reap the benefits of being able to have satellite navigation and a reversing camera in one compact system.

### Don't clutter up your dashboard!

With the Brigade solution you only need one monitor mounted on your dashboard or screen to show both navigation and reversing images. The monitor can automatically show the reversing camera image when reversing and the route information at all other times. And with a sat-nav system that announces street names as you enter them so you keep your eyes on the road, you have enhanced safety whether you are going forwards or in reverse.
