			<p>Installation Guide BRIGADE For Interior Infrared Camera</p> <p>Before installing the interior infrared camera, ensure that the dash cam is off.</p> <p>1. Install at any suitable location near the dash cam.</p> <p>2. Ensure the following conditions are met before installation:</p> <ul style="list-style-type: none"> Ensure that the interior infrared camera does not obstruct the driver's view. Ensure that the installation location can be easily accessed. Note the interior infrared camera's direction before installation. Ensure that the BRIGADE logo on the camera record is facing the windshield when handling to prevent the sticker from being recorded upon drive. <p>3. After selecting an installation location, clean the spot using a dry rag or cloth. If the installation surface is wet, or if foreign materials are on the surface, the interior infrared camera may not be properly attached to the windshield and may become detached while driving.</p> <p>4. Remove the protective film from the mount's installation surface (1). Make sure the BRIGADE logo on the mount is facing the windshield. Attach the interior infrared camera to the installation location and apply firm pressure to fit it to the windshield (2). Then, adjust the camera angle (3).</p> <p>5. Connect the dash cam's 10-pin port to the interior infrared camera's 10-OUT port via the cable provided with the camera (4). Then, make the cable neatly so that it does not obstruct the driver's view (5).</p> <p>6. After installing the interior infrared camera, record a video to check if the interior infrared camera is properly installed. After the interior infrared camera is connected to the dash cam, it will turn on when the dash cam is powered on.</p> <p>* The interior infrared camera is designed to work only when the connected dash cam is on. If the interior infrared camera is not working properly, turn off the dash cam and check its cable connection with the interior infrared camera.</p> <p>BRIGADE is not responsible for damages to the interior infrared camera, or to the dash cam if it is connected to, caused by incorrect installation. To avoid damage due to incorrect installation, have your interior infrared camera installed by a professional at a licensed installation location.</p> <p>© www.brigade-electronics.com provides various reference materials in order to assist with interior infrared camera installation. Please visit the Product Support Page of the website.</p> <p>*Brigade Electronics is not responsible for damages to the main unit and/or any attached accessories due to improper use or installation. Brigade Electronics strongly recommends professional automotive installation services to avoid such damages.</p>		Part Number 6305 Model Number DC-IR-QG Dashcam IR Camera Quick Guide
